

Procure IT Australia

Independent technology cost and governance advisory

Who we are

Procure IT is an independent technology cost and governance advisory practice. We work with Australian organisations managing complex, distributed technology environments, helping them understand what they spend, what they own, and whether their commercial arrangements remain competitive. We are not a technology vendor, managed service provider or reseller, and we hold no commercial interest in the technology our clients procure.

What we do

Technology Cost Review: an independent review of what you spend across technology, what you are being charged, what is being used, and where governance is missing. Commissioned and owned by you.

Technology Spend Visibility and Governance: an ongoing engagement that keeps your picture current, with inventory, governance, supplier oversight and regular executive reporting.

Commercial and Procurement Advisory: independent advice on contracts, benchmarking, negotiations and renewals, on your side of the table, with no affiliations or commissions.

Why independent

Independent: no vendor affiliations, commissions or preferred partnerships.

Commercially focused: technology decisions are commercial decisions.

Governance-led: visibility and governance first; financial recovery follows.

Operationally grounded: backgrounds in complex operations, not technology sales.

Industries we support

Mining and Resources. Energy and Utilities. Construction and Infrastructure. Healthcare and Aged Care. Professional Services.

Experience

Our team's experience spans complex operations across mining, energy, aviation, defence, food manufacturing and infrastructure, including engagements with organisations such as Rio Tinto, Beach Energy, Teys Australia, AusNet Services, Marlin Brands Group and SundaGas.

Recent engagement: an independent review of a ~\$63k per month mobile and fixed telecom base for a multi-site Queensland operator returned ~\$73k in verified annual recovery, plus ~\$85k one-time, under a repeatable monthly governance cadence.
